

# Senior software Developer ASP.NET (C#) JavaScript

Since 2012, SIRFULL® has offered Asset Management, Preventive Maintenance, and Welding Quality solutions. SIRFULL brings innovative software solutions to manufacturers (boilers & pipe fitters...), operating companies from various industrial and non-industrial sectors (chemical, pharmaceutical, oil & gas, nuclear, transport, local community...). SIRFULL® software solutions help companies to manage their risks and compliance requirements all along their equipment life cycle; from manufacturing to dismantling. Therefore, we provide both customized and standardized software solutions that fit your needs.

Following the strong growth during the last two years, the company wants to improve its position on the European market, starting with the implementation of a company subsidiary in Karlsruhe, Germany.

---
